- > National Parks
- > Health Institutes

Private Companies:

Several private clients operating in: On shore and off shore oil production activities | Oil refineries and relevant facilities | Energy and electrical industry | Transportation infrastructures | Petrochemical and base chemistry industry | Fine chemical industry | Pharmaceutical industries | Metallurgic and steel industry | Manufacturing industry | Agricultural and Food industry | Airports facilities | Engineering and construction

ICARO Srl

ICARO Ltd is a consulting company located in Cortona (Italy), highly specialized in environmental studies, health risk assessment and management, technical assistance, capacity building and training, for private companies and for public Authorities (Ministries and Institutional Bodies).

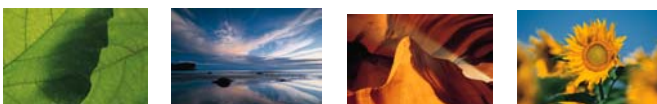

Since its foundation in 1985, ICARO has developed consulting activities, at national and international level, for important industries, for primary engineering and construction companies, for research institutes and public authorities, reaching an important and consolidated position in the national consulting market.

In the 90's ICARO founded an ancillary small Company, **PEGASO** Ltd, in order to develop specialised assistance in Communication, Training and Multimedia activities.

Since its establishment in 1985, ICARO and PEGASO have developed a wide range of consulting and assistance activities in various fields, all falling within the general sector of environment and health protection.

IGEAM Srl

Igeam was founded in 1979 to carry out a consulting and engineering activity as well as services regarding the environment, health and safety, to give technical assistance to bodies and business concerns in the sustainable management of productive processes, of environmental resources and in promoting the overall quality of processes and products.

It offers consulting activities and assistance, planning activities, development of managerial models, transfer of innovative technologies, monitoring, vocational training and communication.

Igeam is the main promoter in the Syndicate IGEAM & PARTNERS, which groups ten firms with a leading role in the field of services and engineering applied to environment, safety and development.

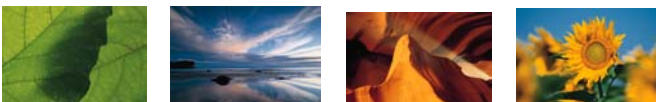

Igeam operates through business units working on an integrated and multi-disciplinary basis in connection with the other firms in the group, through which it can offer its clients the most complete and integrated range of services in this field. The business units are:

- > Environment and territory
- > Health and Safety
- > Management and Audit
- > Training and Capacity Building
- > Communication and crisis management

3TI PROGETTI ITALIA

3TI ITALIA was born in 2002 as the natural outcome of a continual collaboration, established since many years, among a number of companies active in the world of engineering and characterised by complementary experience and mutual synergy.

The richness of such collaborations and the related exchange of know-how led to the significant professional achievements of the latest years.

The fusion of experiences and skills of the companies forming **3TI ITALIA** produces steady teamwork in a variety of design and engineering themes, spanning from architecture to town planning, from road design to structures, plants and infrastructures, from environment to safety planning, from work to project management.

The engineering services supplied by **3TI ITALIA** are based on a combination of know-how and resources apt to provide answers to the variety of needs of its clients, both for the design and construction stages.

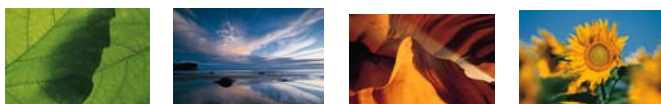

A detail of the fields of activity can be outlined as follows:

- > Design and consulting in architecture and engineering
- > Survey and negotiation
- > Checking and validation
- > Site and construction management
