Mission

IGEAM S.r.l. works to promote a type of development which can combine economic growth, the protection of health and of the environment, the improvement of the territory, the saving of resources and the quality of life.

IGEAM relies on over twenty-five years of experience matured in the national market and is one of the main Italian references for the international market.

Activities

IGEAM performs audits, project design & management, technical assistance systems, technical consultancy, diagnostic surveys, environmental monitoring, communication and training programs and any other helpful service for an integrated, "total quality" management of environmental issues.

IGEAM individuates and designs tailored solutions, taking into due consideration the cost-benefit impact.

Igeam offers consulting, R&D, engineering and services for the benefit of businesses, public bodies, local administrations and institutions.

Organization, processes and quality

- Igeam's organization is flexible, as it is articulated on the basis of local business as well as operative units, which work following a subdivision of tasks.
- The main Office is based in Rome, where the head office and the laboratories are located, whereas Local Operative Units are based in Milan, Faenza, Naples, Melfi and Palermo. In addition, Igeam relies on a network of territorial offices provided by its partners.
- The processes develop within a strict but dynamic Quality System, according to UNI EN ISO 9001:2000 regulation.
- Igeam was the first to develop "Quality Management" through absolutely avant-garde technologies and procedures (Knowledge Management and Business Process Management Systems) able to improve operational abilities, Know How and Reliability of the industry.
